PRESS RELEASE

FOR IMMEDIATE RELEASE

11.09.2025

GHANA TO HOST FIRST-EVER TRANSPORT AND LOGISTICS FAIR OCTOBER 22–24

The Ministry of Transport, in collaboration with Digital Eye, proudly announces the **Ghana Transport and Logistics Fair 2025**, the first of its kind in the country and the sub-region. Scheduled for **22nd to 24th October 2025 at the World Trade Centre, Accra**, this landmark event is set to reset Ghana's transportation sector for **innovation, connectivity, and investment**.

Over three transformative days, participants will witness a dynamic showcase of the future of mobility, from **Electric Vehicles (EVs)** and green transport solutions to **cutting-edge logistics technologies**. The fair will also feature **interactive policy dialogues**, creating a platform for forward-thinking strategies to reposition Ghana's transport and logistics landscape.

His Excellency **President John Dramani Mahama** is expected to open the Fair, underscoring its **strategic national importance** as Ghana aligns its transportation vision with global trends in sustainable development and economic competitiveness.

All agencies under the Ministry of Transport will mount exhibition stands to provide a seamless customer service experience. This will give citizens a unique opportunity to directly engage with transport sector leaders and witness firsthand the initiatives driving progress in areas such as driver/vehicle registration and licensing, aviation, port and rail innovations, and public transport reforms.

The Fair also provides an **inclusive platform** for stakeholders, from **Okada associations and GPRTU of TUC** to logistics companies, entrepreneurs, students, and investors, to connect, share ideas, and forge partnerships. By bridging industry players with the public, the fair strengthens the foundation for a **transportation sector that is modern, connected, and investment ready**.

The Ministry of Transport invites the **media, the business community, and the general public** to participate in this historic event, which promises to shape the **future of transport and logistics in Ghana**.
